Justice for Everybody Harms Nobody

Three Cents

DISEASE

IS THE LACK OF RIGHT ACTION

COPYRIGHTED, 1940

BY ALFRED LAWSON

A Talk Delivered at the Direct Credits Auditorium, Detroit, Mich. Stenographed by D. McCormick, B.G., D.C.S.

UNLESS YOU KNOW THESE THINGS YOU ARE NOT EDUCATED

Among the many inquiries addressed to me is a post card that I received today from a stranger who wants to know something about GOD.

It is as follows:

"Alfred Lawson — Dear Sir:

"You seem to be quite familiar with God and His plans—judging from your papers.

"Why does God permit over 1700 diseases to afflict us?

"What is blindness and infantile paralysis good for?

"Why does God create the tapeworm and intestinal parasites and numberless other creatures that are enemies to man and beast?"

Well, since this subject has been brought up I will have to acknowledge that I am, to some considerable extent, familiar with God and His plans, insofar as an understanding of God's Natural Laws are concerned.

Any one who has studied such of my books as MANLIFE, CREATION, PENETRABILITY, MENTALITY, LAWSONOMY and THE ALMIGHTY will have to admit that I know something about the CREATOR and His methods of transformation.

Of course, if one has not studied those books, one is in no fit condition to discuss their qualities.

When anyone offers an opinion concerning the merits of those books without having studied them, he puts himself into the class of ignoramus with the Professor who told the youth not to read LAWSON'S book DIRECT CREDITS FOR EVERYBODY because, as he said, "It is no good."

When the youngster asked him if he had read that book, the Professor said, "No, I would not read such stuff."

"Well," inquired the boy, "if you have not read the book, how do you know it is no good?"

Professors who are paid by financiers to miseducate the people often find that their pupils are not as dumb as they think they are.

Now, this post card writer, who appears to be intellectually keen, takes the attitude that God is responsible for man's defects.

He asks, "Why does God permit over 1700 diseases to inflict us?"

The answer to that question is, because, according to Natural Law, God permits inactive creatures to perish.

Yes, God allows lazy and degraded people to rot by their own choice.

God furnishes every living creature with a physical body, mental instruments and a spiritual soul

for the purpose of self development. He furnishes an abundance of nourishment for every living creature to subsist upon. He also furnishes numberless constructive microscopic menorgs to work within each creature's body to build it up, make it grow and keep it in repair.

These menorgs, who keep the creature in repair and operate its mental and physical movements, depend upon the strength of the Soul to properly guide them in the selection of the correct building materials required for growth, repair and self development.

Air, water, sunlight and vegetation are the four main materials that man requires for his subsistence here on Earth.

To withhold these materials in their natural state from human creatures makes it impossible for the menorgs to keep their machinery in workable condition.

So through the lack of the proper materials with which to build and repair the

different organs, muscles, bones, etc., of the body they decay and the body suffers the consequences of improper functioning.

According to the different parts of the body that are affected by the lack of necessary building and operating materials, the medical fraternity apply grandiloquent names for the different disorders that result therefrom.

Now if you asked that post card Doctor to give you the proper definition of the word disease, he couldn't do it.

So he wrote to Alfred Lawson to learn something about the subject. That act showed signs of intelligence. He evidently assumed that

there was a man on Earth that could answer his questions correctly, although he wasn't quite sure that this man could answer them either.

He had probably waded through many shelves of books relating to the subject and had been unable to find anything but fanciful theories that led him into a mess of

AGAIN, in 1904 when he first called public attention to the subject.

To understand such things, including God's great law of MANEUVERABILITY, one must study the three volumes of LAWSONOMY which elucidate the Physical, Mental and Spiritual Manifestations of God. The first copyright

on LAWSONOMY was in 1922.

To be specific, a disease is not a tangible thing at all. It is a result that is caused by the lack of action.

Action is life. Inaction is death.

Every creature is built up as an operating machine from many different kinds of materials.

The microscopic menorgs that build up a creature from within, draw the building materials from without, from the different surrounding densities.

The elements that the menorgs extract from extraneous substances with which to build up man are too small for the human eye to see.

They extract these microscopic elements from the food one eats, after due preparation, for the purpose as well as from the water one drinks and the air one breathes. They build one up into a working machine through the addition of billions of cells that are too small to be seen through the naked eye.

To move this arm of mine requires the concentrated efforts of billions of Menorgs working together under orders from one little Menorg up in my brain acting as the director of mental forces throughout the mental system of my entire body.

Those billions of microscopic

Menorgs could not secure the power to raise that arm of mine unless I furnished the right materials in the shape of food and drink and air from which they extract the elements to do it with.

So, for the lack of right action on my part that arm of mine would become paralyzed. It would not move at all.

Therefore, under such circumstances, I should not blame God for such paralysis, but I should blame myself for the lack of right action that caused it.

One might as well blame God for not running his automobile when he has not put the gas in its tank for that purpose as to blame Him for not running one's body when the proper materials have not been put there to do it with.

It is merely the inefficiency of the different parts of the body, caused by lack of action, that the doctors refer to as diseases.

So if you want to be entirely free from any or all of these 1,700 diseases that the inquiring doctor mentions, you can accomplish it only by giving the machine God loaned you for a useful purpose, the right action through the use of proper materials that you put through the various orifices of your body.

Lack of exercise has much to do with the inefficiency of the different parts of the body. Too much exercise is also the lack of right action, or the result of wrong action.

The development of a perfect body without aches or pains is caused by the balancing of exercise, nourishment and rest as fully explained in my book, "MANLIFE"

Now the aforesaid inquirer asks, "Why does God create the tapeworm and intestinal parasites and numberless other creatures that are enemies to man and beast?"

If this inquirer had studied LAWSONOMY he would have learned that God utilizes every thing without the loss of anything. This is accomplished through the creation of numberless living creatures that absorb all so-called waste matter. So that lack of right action that causes paralysis and death to one creature furnishes activity and life to other creatures.

So, the tapeworm, as well as all other species of worms that infest man's intestinal regions, are there to absorb the filth that man generates by his degrading habits.

The lack of common salt taken with one's food is the cause of some species of worms that disturb man's composure.

The lack of common salt eaten with the food also causes goiter

INFINITISMS

(TRUTHS FOR ALL TIME)

By Alfred Lawson

ONE GOD FOR ALL AND ALL FOR ONE GOD.

To Know God One Must Understand His Laws.

LAW IS THE RULE OF PROCEDURE.

GOD'S LAWS are BASED UPON USEFULNESS.

Lawsonomy Is Knowledge of God's Laws.

God Does Not Change His Laws for Anybody.

IT IS DANGEROUS to REFUTE GOD'S LAWS.

There Can Be No ACT Without a RE-ACT.

True Character Is Formed by Unselfish Acts.

Character Is More Valuable Than Wealth.

If Man Will Act Right He Can Have Knowledge.

Senses Were Created to Absorb Intelligence.

God Permits Inactive Creatures to Perish.

Growth Does Not Begin with Its Fullness.

The Works of God Prove His Greatness.

falsification that almost ruined his reasoning faculties.

Well, to answer his questions with absolute facts as a basis to start from, one must have an insight to God's Natural Laws, with a knowledge of such amplifications as densities, spheres and scopes that lead to the methods by which God magnifies, condenses, simplifies and transforms matter through a process of Penetrability that makes it possible for Him to utilize everything without the loss of anything throughout all space and eternity.

Of course, such studies as these were not mentioned before Lawson published his book, BORN

and various other diseases.

For those who suffer with goiter, I would suggest cutting down on the quantity of food eaten, especially meat, and make up the diet from raw vegetables, fruits and berries. A tablespoon full of good vinegar once a day will help considerably.

The so-called horrible Cancer is generated through the taking into the body of decayed foodstuffs. The eating of meats that are reeking with microscopic maggots, a practice so prevalent these days, is enough to develop cancer, gout and many other deadening ailments within the human body.

Eczema and other forms of skin diseases are caused from eating and drinking embalmed milk foods such as chocolates, cocoa and creams of various kinds and the lack of such foods as lemons, grapefruit, oranges and raw onions.

The people of the world are fast deteriorating through the consumption of vast quantities of embalmed foods which cause the lack of life building cells for both muscle and mind.

The manufacturers embalm food nowadays as the Egyptians used to embalm their Mummies. They inject poison into the foods to make them immune against microscopic consumption.

But the poisoned food that the microbes won't eat is not the kind of food that the microscopic Menorgs can build up into healthy human beings.

So, to enjoy good health one must partake of food exactly as nature has prepared it in its raw state through plant life and as it has been properly cooked for human consumption by the heat from the Sun.

Asthma and various other ailments affecting the nose, ears, eyes and throat are caused from lack of proper breathing.

One of the first things that a child should be taught is to always breathe through the nose. Under no circumstances should anyone breathe through the mouth.

To keep the nose, ears, eyes and throat free from decaying disorders one should dip the head and neck into a tub of ice cold water upon arising in the morning and before going to bed at night. The ears should be allowed to fill up with the water and the eyes should be kept open and the eyeballs kept moving about within the water.

To help develop a good, healthy body one should also take cold baths upon arising and before retiring each day as long as one lives.

Lack of proper evacuation of waste matter, either in solid or gaseous form, through the regular channels, orifices and pores of the skin, lead to early decay of muscles and organs.

Paints and powders smeared upon the female face, fill up the pores of the skin, causing lack of evacuation of poisonous gases therefrom, which eventually turns the skin into a leathery crust and forces the face to crack whenever one tries to smile or look pleasant.

Lack of kindness, tolerance and lovability causes hate and jealousy to take possession of the mental system which turns it into a seething inferno that makes life a maddening existence that is impossible to bear and finally ends in physical and mental torture through the conscience to the soul.

The post card inquirer wants to know. "What is blindness good for?"

The internal Menorgs that build man up from a microscopic seed to his natural stature, constructed magnifying glasses in the front of his head through which they could peer into the surrounding densities and observe what was taking place in a natural way.

The Menorgs built these magnifying glasses, which man calls eyes, properly, but sometimes man, through lack of proper usage, destroys their machinery and they cannot see what happens on the outside of the body.

Such a condition is called blindness.

It is pitiful to think that man would destroy his own power of sight through lack of right action.

Many times during the past have I been told of men going blind after drinking wood alcohol.

The physical sight of man is not only destroyed by his idiotic vices but his mental and spiritual sight is also wrecked by such debasing practices.

To quote the chapter on Vices from my book MENTALITY:

"A vice is an unnatural act that deteriorates the physical mental and moral machinery of man.

Vices reduce man to an unbalanced idiot in which condition he cannot even recognize himself as such.

So as men are comparable to themselves, and if the majority of them are idiots, then they announce themselves as sane and wise.

If a man puts sand in the carburetor of the engine that furnishes power to make an automobile run and the machine will not work, the average man who understands autos will denounce him as being insane.

But if the majority of men are drunkards and they see the same man put whiskey into his stomach which stops his reasoning faculties from working they pronounce him as being sane for doing it.

Now, in the sight of Nature, any man who wrecks his own body and mind through the use of false materials is an unnatural idiot, whether everybody else is addicted to such degraded vices or not.

There is a reason why human beings become idiots. It is because their minds are not strong enough to control the different functions of their bodies.

The dilapidating Disorgs will get possession of a function of the mental system through the weakness of the mind. Then, one by one, they will take possession of other functions until the mind has lost all control over them and the body staggers about like a ship without a pilot.

A bit of wisdom has made man the most ludicrous of all animals.

One may hunt the world over but can find no other animal strutting around with a lighted pipe or cigarette stuck in its face and using its mouth to suck in and blow out smoke, using at times the nostrils as human smokestacks during the operation. But there are men and women who actually make believe they are talented by conducting themselves in such a grotesque manner.

Minute particles from smoke sucked in at the mouth are drawn into the lungs and get into the blood streams and finally saturate every cell and tissue of the body. The poison overpowers the Menorgs who cannot do their work properly and the entire mental system breaks down. Thus not only has the WILL of man been weakened but in time he becomes a nervous wreck that is pitiful in the sight of God.

It is worse for women to "smoke" than men because a mother must feed the mental system of her offspring from her own blood as it grows from a microscopic seed to the new-born infant.

A child born from a mother that "smokes" has very little chance to survive and grow up strong and able to compete successfully in life with children from parents without vices. Therefore, to a very large extent, mothers are responsible for the weaknesses of their children.

Abnormalities in sex relationship are terrible destroyers of the mental system and such vices must be avoided by human beings who would become strong enough to live a natural and useful life.

Gluttony is a vice that wrecks the WILL of man and shortens the number of years he should remain upon earth to perform his natural obligations.

Nature makes pleasant those duties man must perform to live and multiply, but man degrades

himself and throttles the usefulness of posterity by over-indulgence and abnormal practices known as vices, and, according to the law of reaction no one can escape the penalties of their deteriorating acts."

Now, the people are not only going blind Physically. Mentally and Morally, but they have already gone blind socially owing to their lack of right action.

Social disease is the result of wrong action. The people of the world are now socially sick. They have been poisoned by a mania for money. They have money phobia and are beginning to froth at the mouth on account of it.

They have permitted financial swindlers to take possession of their money system and charge them tribute for the use of it.

In order to do this the financiers curtail the quantity of money put into circulation so that there is not enough to use as a trade convenience. They then force manufacturers, professionals, merchants, farmers and laborers to pay interest for credit which is multiplied to ten times as much as the actual money in use.

The financiers pretend to let everybody in on their swindling game and by false promises make the people believe that they are getting a part of the swag.

The Direct Credits Society has been organized to teach the people the truth concerning this financial swindle, and, by getting them to stand together for right action they will then repossess the money system which belongs to them, according to the Constitution of the United States of America, and establish a system that will give everybody a purchasing power equal to their productive power.

The swindling financiers have been able to paralyze the social machinery of the world through the wrong action and blindness of the people. But now the people are going to turn the tables on the financiers and through right action stop the interest collecting swindle.

Thus, by withholding the interest from the crafty financiers the people will give to them the disease that will paralyze their crooked game forevermore. And that will be the most practical disease ever administered to any creatures upon Earth.

ABOLISH INTEREST that the financiers are surreptitiously extracting from the billions of people that make up the social structure and mankind will quickly recover a healthy condition together with an ambitious strength that will soon lead them forward toward the greater work that God has planned for humanity to do in the future.

Under the new money system as planned by Alfred Lawson and published in full in his copyrighted book, KNOW BUSINESS, money will be made to spend and not to hoard or sell.

The Lawson Money System is the opposite from the scheme operated by the financial swindlers. It is a practical plan that will give fairness to everybody and take advantage of nobody.

This system will be owned, controlled and operated by the people themselves under the management of their trustee — the government.

The money will be loaned to the people by the government, acting as trustee, without any charges for its use whatsoever.

As soon as Direct Credits for Everybody becomes a law the government will issue new money in sufficient quantities to meet all trade requirements.

Plenty of money will mean plenty of buying power. Plenty of buying power will mean plenty of trade. Plenty of trade will mean plenty of production. Plenty of production will mean plenty of employment.

The abolition of interest tribute, the adoption of Direct Credits for Everybody and the putting into circulation enough money for all trade purposes will be the means of electrifying the people and making a new and greater life for mankind.

WHERE LAWSON STANDS

A RECITATION

**When Lawson built the first Airliner
Financiers said to him "you're great."
We'll own them everywhere forever
And fabulous wealth we're sure to make.
So on their newspaper's very first page
His deeds were told with elaborate praise.
He appeared a hero in their slick eyes,
They called him Admiral of the skies.**

**They said we'll build these ships galore
And control the heavens forevermore.
With you the genius upon our side
We'll finally own the air we ride
As we now own the earth and dust
With rivers and lakes above its crust.
It is plain to see that all we'll need
To enslave mankind is the air they breathe.**

**But Lawson said it's not wealth I care,
I want everybody to have my share;
The people I would like to raise
In intelligence to a higher stage,
So anything of value that I may earn
Must go to the people as their own.
Let's encourage them to a better deed
By worthy actions opposed to greed.**

**That unselfish speech sure did amaze
Those fiendish imps of the Golden Age,
And in their wrath they yelled Oh, no,
Such rot as that no one must know.
Your reputation which now deceives
We'll cut from our publicity leaves.
We'll force you down from all your fame.
The future will never know your name.**

**But Lawson said that all could be,
You may drive me to obscurity,
But a greater BEING than a financier
Is whom I depend on for my career,
It's HE who gave me a mind to think,
Plenty of food to eat and water to drink,
HIS advice to me is always right,
From HIM, not you, I'll get my might.**

**Then Lawson by good work did stress
His teachings of unselfishness,
He let the sordid financiers alone
And went among the people unknown.
He told them that they must all unite
And stand together for what's right,
To quit the devilish slickers' game
That robs them of their strength, with shame.**

**That so enraged the wealth-mad cheats,
They sent their touts as lying beats
With undermining stealth they crept
Through every path that Lawson stepped.
They shrieked this man has no standing
That newspapers never mention him.
Weak-minded people believed their lies
And tried to break his friendly ties.**

**But here and there he gradually met
Strong men and women of a greater set
Who stood together to gain more strength
And to follow Lawson to any length.
And so his following grew and grew
Until most everyone said, we knew
This man's our friend—he's not our foe,
Look, he's as poor as Jobelow.**

**So now his friends are millions strong
Who stand with him against all wrong.
They vow they'll stick to him for right
And know that God will give them might.
They sing that he's Almighty's choice
To lead man from degraded sloish
And soon all cheats will be made to run
From billions of converts yet to come.**
